ABOUT OUR COMPANY

Fanavar Plastic Sepahan corporation (F.P.S CO) has been established in Najaf Abad industrial zone in 2005, with the aim of manufacturing PVC, UPVC and WPC building components. Currently we operate more than 120,000 square meters manufacturing facilities using the largest extrusion lines and known as one of the leading producer in the field of polymer constructional parts in the country.

Fanavar Plastic Sepahan Co aims to supply its innovative products along with global strategy of energy consumption and fuel efficiency. On this basis, it has been developing a variety of polymer building materials in order to protect and preserve fossil fuels, as well as to increase the quality of construction products and the speed of construction, optimization of construction materials prices, building stylization and other capabilities that benefit from these products. F.P.S.CO has always been ahead of the building products industry in the country. As the leading building solutions provider which has been committed to quality

and innovation we distribute various upvc products by providing our 4 brands such as vinyl siding and accessories (C.PAN SIDING), windows and door profile (C.FOUR), indoor siding panels and ceiling (C.PAN), wood polymer doors (C.DOOR).

OUR INTRODUCTION

CPAN provides a wide range of upvc products such as indoor wall, ceiling and accessories as well which come in variety of colors and wood textures. CPAN are most suitable to use as interior decorative elements.

CPAN Indoor Walls & Ceiling includes variety of products in the category of building decoration such as different type of coated wall and ceiling covering, 60 * 60 ceiling tiles and installation accessories. CPAN wall and ceiling coverings that come in different colors and patterns

are very high quality with reasonable price, therefore it is a good choice in compare of other products on the market. CPAN UPVC wall and ceiling with high quality coating and resistance come in variety of colors and wood textures are suitable to use as interior decorative elements.

Vinyl Siding Panels

Vinyl Siding Is An Exterior Cladding For Homes And Buildings CPAN vinyl siding innovated a new way to offer the more natural texture with premium thickness. Using our unique production process, we will be able to produce vinyl sidings with lifelike textures and details which are not possible with the current products. Different textures such as wood, marble, metallic colors, etc. are all possible in the new production system opening up the product line to an unlimited possibility of styles to cater to the various tastes of customers.
